Education

General Assembly

Software Engineering Immersive

My time here taught me the ins and outs of being a Software Engineer.

Key Skills

Frontend	Backend
HTML	JavaScript
CSS	Python
JavaScript	SQL
	MongoDB

Frameworks / Libraries

Frontend	Backend
React	Node
Bootstrap	Express
Materialize	Django
Semantic UI	Passport
jQuery	

Objective

I'm a former teacher turned Software Engineer that specializes in Full Stack JavaScript and seeks to always learn new technologies to stay ahead of the tech world curve. I use my teaching experience to approach everything with a learner's mindset.

Projects

Help Desk - GitHub - View Live Version
An IT ticketing system with full CRUD and user roles.
Technologies Used: MongoDB, Express, Node, Bootstrap, JavaScript

Wayfarer - GitHub - View Live Version
Travel app that lets users post about destinations in popular cities.
Technologies Used: Python, Django, PostgreSQL, Materialize

Walk With Me - GitHub - View Live Version
Dog walking app that lets users make appointments to walk dogs.
Technologies Used: MongoDB, Express, Node, JavaScript, Passport

Yurblegatchi - GitHub - View Live Version
A fun clone of the 'Tamagotchi' craze from the 90's.
Technologies Used: HTML, CSS, JavaScript
